All my 12/22/75, FBI/Ruby; Oswald

HW:

The attached may be the opening gun (no pun intended) of the NY Times stuff you've been talking about. Haven't seen the rest, as we're behind in our work and won't catch up until after S. Claus has come and gone.

Your fat mailings of Dec. 13 and 17 both here, but have been able to sort through them for direct communicationsx only.

Glad to hear you're doing so well. The better sleep must come from a general feeling that things are moving, some sort of progress is being made or in sight. Hope it continues.

More later,

Best from us both to both of you,

Jim
